Peertechz Publications

Peertechz stands as a committed leader in the sphere of online publishing, with a particular emphasis on science, technology, engineering, and medical science domains. We are experts in handling and publishing Open-Access scholarly journals online. We aim to lead in online publishing while concurrently generating lasting value for ongoing scientific explorations and breakthroughs.

Vision

Our ambition is to create a universal platform for open journals, fostering superior research publications in Science, Engineering, Technology, and Medical Science, with unrestricted access.

Open Access Policy

Peertechz firmly upholds the value of Open Access, a fresh perspective in the digital publishing field. This method guarantees that the inherent worth of an author's research and scholarly contributions is freely available online without any specific charges. All manuscripts published in Peertechz journals are protected by the Creative Commons Attribution License, which offers immediate and permanent free access to all types of original works. This license grants copyrights to the respective authors and facilitates the wide distribution of the articles. Everyone is invited to use these manuscripts in a manner that contributes to society. However, authors are respectfully reminded to keep the citation to the source.

Peer Review Mechanism

Peer review mechanism of Peertechz is a proven system to assess the quality of research and its presentation, prior to publication. Anonymous and efficient reviewers and editors with immense experience in the related field scrutinize the submitted manuscripts. The validity and originality of the manuscripts are judged on different levels of evaluation. The main aim is to publish an article which can be breakthrough in its area of study. According to a survey more than 1.5 million scholarly articles in different academic streams are published each year, therefore Peer review becomes a prominent tool to select which research should be brought to the attention of other researchers. It also gives authors feedback to improve the quality of their research papers before publication. The peer review system judges the validity, significance and originality of the work, rather than who has done it.

Indexing Status

Peertechz believes that indexation of a journal is a reflection of its quality. With the consideration that indexed journals are of higher scientific quality as compared to non-indexed journals, we are in a process to index our journals in maximum databases.

We are indexed in various databases; namely CiteFactor, ResearchBib, Scientific Indexing Services, Scholarsteer, SHERPA/ROMEO, InfoBase Index, Journalindex.net, IPonlinejournal.com, ICMJE, etc. We are also in progress for getting indexed in DOAJ, Scopus and Index Copernicus, Thomason Reuters, etc.

Here is the partial list where we are already indexed:
