[\*\*Drilling speed-up and production-increasing development practice of ultra deep clastic reservoir based on Geology-Engineering integration in the Tarim Basin, Northwest China\*\*](#)

Published On: October 15, 2022 | Pages: 001 - 010

Author(s): Guodong Ji\*, Changchang Chen\*, Haige Wang, Hongchun Huang, Qiang Wu and Li Liu

Kelasu structural belt in Tarim Basin has a large reservoir burial depth and complex geological conditions, and challenges such as ultra-deep, high temperature, high pressure, and high stress lead to big problems related to well control safety and project quality. To solve these key technical problems that set barriers to the process of exploration and development, a ...

[\*\*Why is it necessary to declare the Strait of Gibraltar an environmental control area?\*\*](#)

Published On: November 23, 2022 | Pages: 011 - 012

Author(s): Vanessa Durán-Grados\*

Air pollution remains one of the most sensitive and harmful environmental concerns. According to a recent report 1 published by the World Health Organisation (WHO) [1] and the Organisation for Economic Co-operation and Development (OECD), in 2012, ambient air pollution was still responsible for about 500 000 premature deaths in Europe. ...
