[Targeting interleukin-4 and interleukin-13 in the treatment of severe eosinophilic asthma](#)

Published On: February 02, 2023 | Pages: 001 - 011

Author(s): Nightingale Syabbalo*

Asthma is a chronic inflammatory airway disease affecting about 300 million people and responsible for 500,000 deaths annually globally. Eosinophilic asthma is one of the most common phenotypes of asthma. It constitutes about 50% to 60% of all cases of asthma, and it is the most common phenotype in children presenting with severe acute asthma. The mechanism of eosinop ...
