

JOURNAL OF NOVEL PHYSIOTHERAPY AND PHYSICAL REHABILITATION (ISSN: 2455-5487)

INVITATION FOR SPECIAL ISSUE

Special Issue Title: Stroke Rehabilitation and its Symptoms

Guest Editor: Brenton Hordacre, Post-doctoral researcher, Australia.

Dr. Brenton Hordacre is a researcher in the Robinson Research Institute, Department of Medicine at The University of Adelaide, Australia. He received a PhD in Rehabilitation and Aged Care from Flinders University in 2014. Dr Hordacre's research has focussed on human neurophysiology and brain plasticity using non-invasive techniques such as brain stimulation and imaging to improve functional outcomes for various pathological presentations. Dr Hordacre is an experience physiotherapist who continues to work clinically in amputee, orthopaedic and neurological rehabilitation. He has a wide range of teaching and consulting experiences including physiotherapy curriculum. Areas of expertise and Interests are Physiotherapy, Stroke, Amputee, Multiple Sclerosis, Parkinsons Disease, Rehabilitation, Transcranial Magnetic Stimulation, Electroencephalography, Neuroplasticity, Transcranial Direct Current Stimulation, and Prosthetics.

Sincerely,

Vishwa A
